

# Cybersecurity & Risk Management

Enabling Transformation  
towards Cyber Risk Assurance

[www.cotelligent.com](http://www.cotelligent.com)

## About us

Cotelligent is a framework-driven solution-agnostic organization dedicated to helping companies operationalize a unique solution program that matches every business requirement. Our expertise and knowledge base are gathered from our 150 plus engagements across the globe. This practice enabled us to build customized solutions, utilizing the appropriate services to address challenges the cybersecurity industry is facing today. Our implementation services include Identity Access Management, Governance Risk and Compliance as well as Threat Management to clients from various business domains such as Healthcare, Public sector, BFSI, Retail, and Federal, etc.

## Intellicta

Is an integrated Cyber Risk Management platform that helps the board and C-Suite executives be informed about the risk posture of their organization in real-time. It helps enterprises of every size to identify and respond to the risks from enterprise systems, in both on-premises or cloud.

### Key Features

- Enterprise Executive Insights
- Aligned Industry Standards Controls & Regulations such as ISO, HIPAA, SOX, IRA, PCI, GDPR, and more.
- Understand, evaluate and measure the effectiveness of existing cybersecurity, governance, risk, and compliance programs
- Customized dashboards to meet your business needs
- Quantifiable metrics from ISM3, NIST, ISO, and other established models
- Prioritize risk investments and track progress continuously
- Determines a quantified risk score and financial metrics

## Are you aware ?

The high demand for IT risk management has grown with increased cyber risk & governance and board oversight and this is troubling Enterprises and CISOs with...

- High complex & diverse IT, security stacks, and tools
- Zero prominence of overall risk posture
- Hidden costs, security breaches, and no breach prediction
- No regulatory compliance

## Our Services

Enterprise Governance, Risk & Compliance

Identity and Access Management

Integrated Threat Management

Data Protection and Privacy

Digital Enablement Services

### Identity and Access Management

Identity is flagship of any corporate resource or data. We help you manage your identities & provide access to your employees, customers, and partners to streamline your digital transformation.

- Identity Lifecycle Management
- Identity Federation and Role Management
- Single Sign-on and Access Governance
- Identity Management Solutions Integration

### Integrated Threat Management

Attackers take advantage of a multitude of attack vectors to gain a foothold into organizations. We help you defend against threats and gain visibility across your devices, networks, and apps to stay ahead.

- Consulting and Professional Services
- Managed Security Services
- Support and Maintenance of Security Products and Infrastructure

### Enterprise Governance, Risk & Compliance

Reduce exposure towards cybersecurity risks like data breaches and non-compliance. With our well-organized programs, we will combine technology, people, & processes to guard against perilous activities among users, devices, networks, and applications.

- Information Risk Management
- Compliance Services
- IT GRC Automation
- Governance and Audit Advisory Services

### Data Protection & Privacy

Ensuring privacy and security of sensitive data is critical and needed for enterprises today. Find your sensitive data across networks, databases, applications, and more, measure compliance and protect your organization with DLP policies.

- Data Masking and Encryption
- Data Security Compliance Assessment and Implementation
- Data Leak Prevention (DLP) Program Creation and Enforcement
- Identity Management Solutions Integration

### Digital Enablement Services

Digital Transformation is very complex for every enterprise business and that is where Cotelligent enables its clients helping through the transformation of Design Thinking and empowering clients with their best available workforce support.

- Optimize Digital Experience with Customizing Digital Technologies
- Enabling Cutting-edge Technologies in your Digital Transformation
